1. The outside aluminum platings for the construction of the first boat of type Forelle were finished, and work on the boat at the shipyard will therefore be completed soon.
2. Immediately upon completion of the first boat, three more boats will be built. For this purpose, the southern side of the new ship construction shop near the Rosslau shipyard will be cleared of the construction devices for luggers (Kuehllogger). The latter will be temporarily stored in the open.

Comment. The construction of the Forelle speedboat made slow progress in the fall of 1954, since 6-mm sheets for the outside plating, which had to be made salt-water proof, were not delivered.
